How Do We Formulate Erasure Using Statistical Independence ?

$$Z_\theta = \varepsilon(X; \boldsymbol{\theta}) \quad \rightarrow$$

How Do We Formulate Erasure Using Statistical Independence ?

$$Z_\theta = \varepsilon(X; \boldsymbol{\theta}) \quad \rightarrow$$

$Z_\theta \rightarrow$ Random Variable After Erasure

$S \rightarrow$ Random Variable Represent Unwanted Label

$Y \rightarrow$ Random Variable Represent Utility Label
