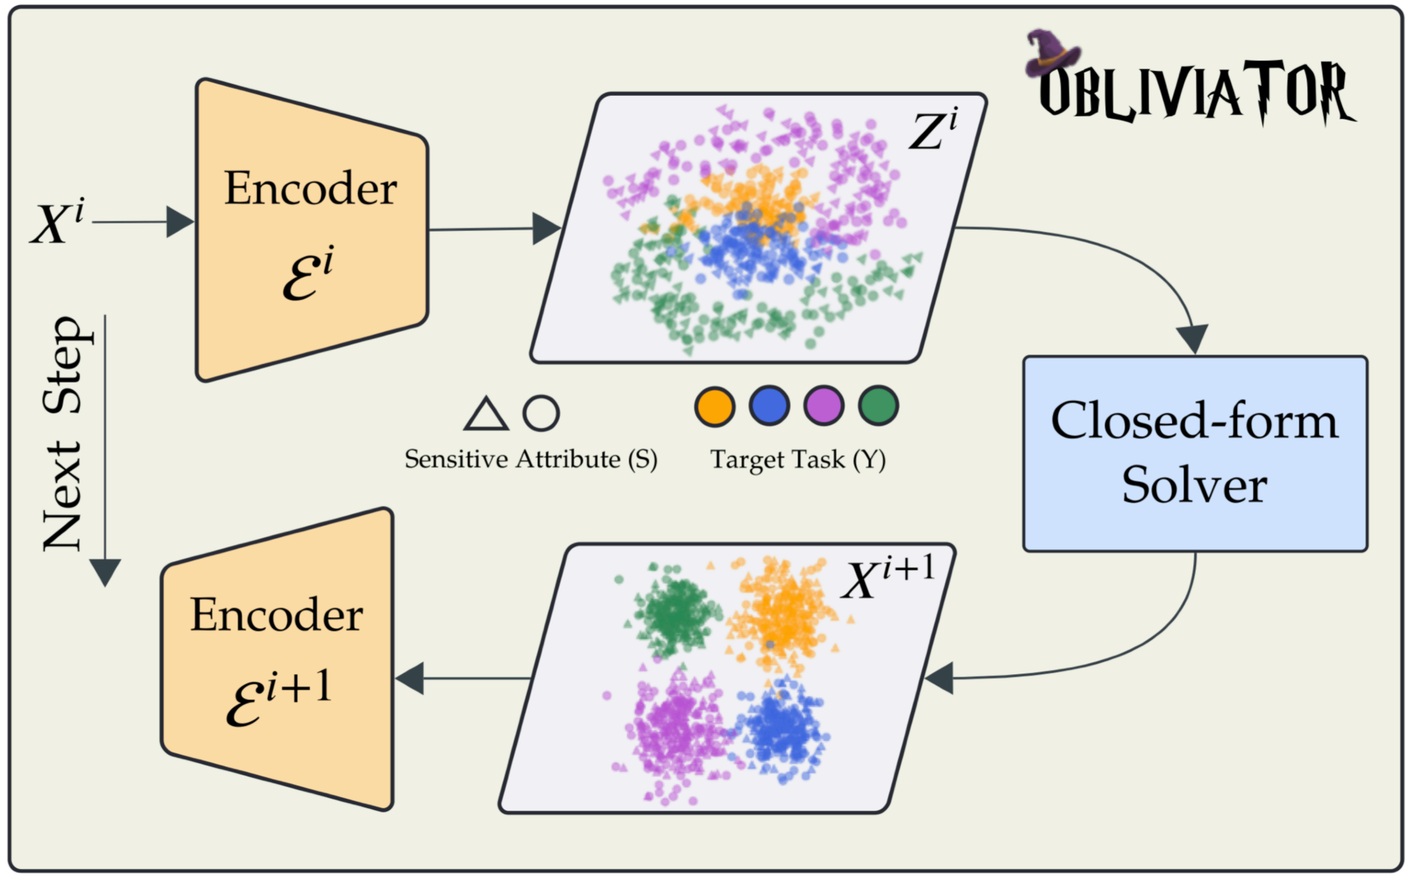
How Do We Solve This Optimization ?



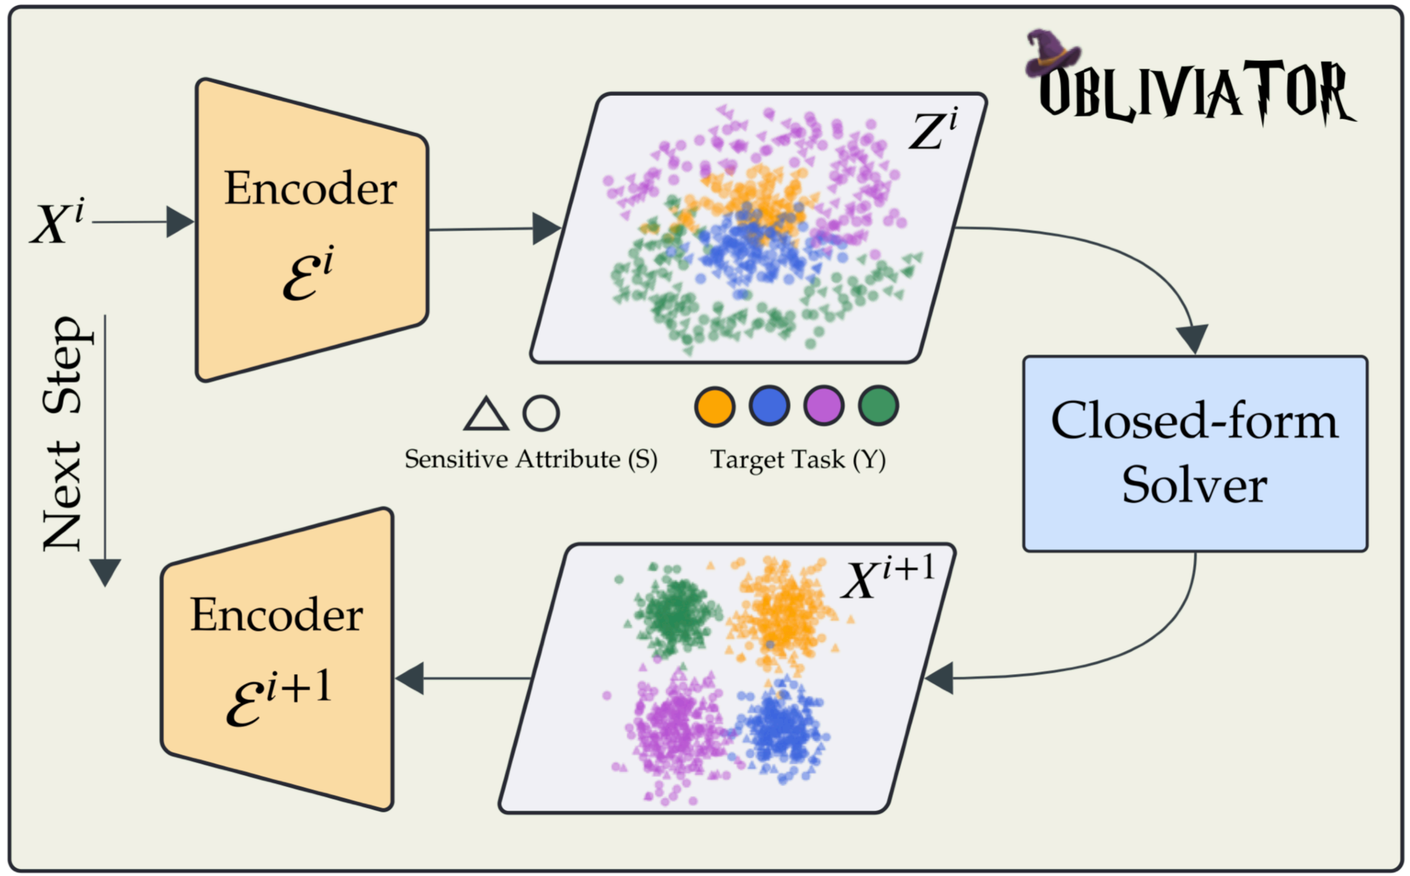
Step One

Erase and Preserve via guarding function $Z_\theta^i = \varepsilon^i(X^i; \boldsymbol{\theta}^i)$

$$\inf_\theta \quad \mathbf{HSIC}(Z_\theta, S) - \left[\mathbf{HSIC}(Z_\theta^i, Y) + \mathbf{HSIC}(Z_\theta^i, X) + \mathbf{HSIC}(Z_\theta^i, X^i)\right]$$

More Information-Preserving Loss

How Do We Solve This Optimization ?



Step Two
